

Adaptive Innovations

Adaptive Innovations applies years of design and development engineering to create cost effective custom designs and solutions. Our diverse engineering background allows us to develop manufacturable solutions that are also aesthetically pleasing. We continuously exceed our customer's expectations by combining our experience and resources to each project's unique demands. Let an A-I engineer drive your idea or design concept to production, and learn the advantage of working with Adaptive Innovations Corporation.

A "Turn Key" Design and Development House, Adaptive Innovations offers services from concept through production.

Most Requests for Quote are turned around within 24 Hours or less!

Complete Engineering Design And Development Services

Product Development
Concept Development
Prototype Development

Mechanical Component/Assembly Design/Development
Custom Equipment Design and Build
Electronic Packaging - Enclosure Design
Electro-Mechanical System Design

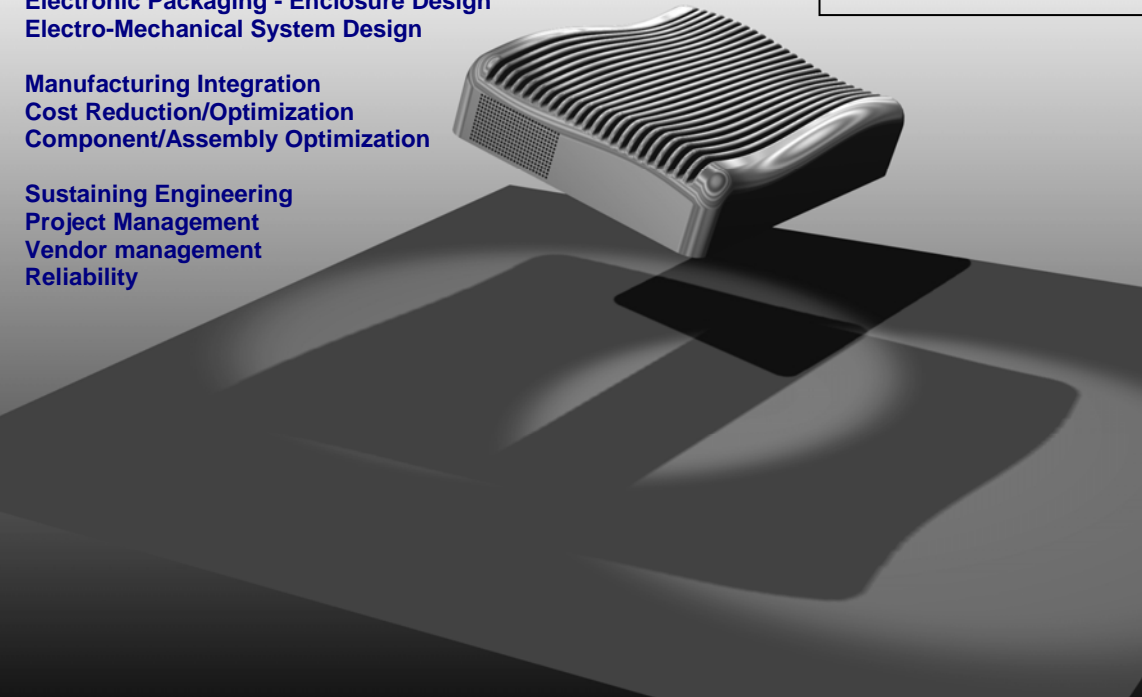

Manufacturing Integration
Cost Reduction/Optimization
Component/Assembly Optimization

Sustaining Engineering
Project Management
Vendor management
Reliability

Parametric 3D Solid modeling

FEA Design Analysis
Fluid Flow Analysis
Thermal and Airflow Analysis
Optimization

2D & 3D Conversion Services
Legacy Drawing and CAD data
Conversion/Updating
